BOTTEGA VENEZIANA

MURANO GLASS FACTORY

CARE AND CLEANING

Murano glass

Chandeliers and wall lights in glass handcrafted in Venice

Murano glass needs little care: water, soft cloths and no chemicals.

Routine cleaning

— Dust is removed with a soft feather duster.

— No excessive pressure on the glass elements.

Thorough cleaning, without disassembly

— A clean, soft cloth, slightly dampened with water only.

— Passed gently over the glass, without rubbing.

— Dried immediately with a dry cloth to avoid marks.

Cleaning with disassembly, when needed

— Elements are removed one at a time, with the power switched off.

— Each element is washed with water only and dried completely before refitting.

— Elements are laid on a soft surface, kept apart from each other.

To avoid

— Alcohol, ammonia, bleach, solvents and glass cleaners.

— Abrasive sponges, rough cloths, steam cleaners.

— Liquids sprayed directly onto the chandelier.

Small differences in colour and shape between elements are inherent to handcrafted glass and are not defects. Each element can be reproduced and replaced individually.
